DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-15, 18 and 20 have been fully considered.

Claims 6-7 and 12-14 are as amended are in condition for allowance.

2. Applicant's arguments with respect to claims 1-5, 8-11, 15, 18 and 20 rejected over Challacombe (3,721,297) have been fully considered. The rejection is withdrawn.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 11, 15, 18 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Mohaupt (5,005,641).

Mohaupt discloses a well stimulating device capable of meeting applicant's claimed inventive concept. Referring to the figure 1 of Mohaupt a tubular assembly of solid gas generators (28) having an outer surface and a central channel, part of said assembly being clad on its outer surface and part of the assembly being bare on its outer surface (openings 40). An igniter (spark igniter) (32) further resides in the upper end portion of the gas generator.

Additionally note cable (36) for lowering the well stimulating device of Challacombe into a well.

Art Unit: 3641

While patent drawings are not drawn to scale, relationships clearly shown in the drawings of a reference patent cannot be disregarded in determining the patentability of claims. See In re Mraz, 59 CCPA 866, 455 F.2d 1069, 173 USPQ 25 (1972).

With regard to claim 18 statements of intended use, field of use, or "so constructed that " clauses are essentially method limitations or statements of intended or desired use. Thus, these claims as well as other statements of intended use do not serve to patentably distinguish the claimed structure over that of the reference. See In re Pearson, 181 USPQ 641; In re Yanush, 177 USPQ 705; In re Finsterwalder, 168 USPQ 530; In re Casey, 512 USPQ 235; In re Otto, 136 USPQ 458; Ex parte Masham, 2 USPQ 2nd 1647.

See MPEP § 2114 which states:

A claim containing a "recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from the prior art apparatus" if the prior art apparatus teaches all the structural limitations of the claim. Ex parte Masham, 2 USPQ 2nd 1647

Claims directed to apparatus must be distinguished from the prior art in terms of structure rather than functions. In re Danly, 120 USPQ 528, 531.

Apparatus claims cover what a device is not what a device does. Hewlett-Packard Co. v. Bausch & Lomb Inc., 15 USPQ2d 1525, 1528.

As set forth in MPEP § 2115, a recitation in a claim to the material or article worked upon (i.e., the gas generator) does not serve to limit an apparatus claim.

With regard to claim 20 it appears from the figures that the claimed ratio of bare to clad parts of the charge are met by Challacombe.

The examiner would like to further point out that the claims are open-ended (comprising). Note that comprising is open-ended and does not exclude additional, unrecited elements. See § MPEP 2111.03.

Allowable Subject Matter

5. Claims 2-5 and 8-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. This application contains claims 16, 17, 19 and 21-37 drawn to an invention nonelected with traverse in Paper No. 13. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
